

The drawing illustrates a road cross-section with a total width of 11.00m. The central section consists of two 4.00m wide lanes (Fahrstreifen) separated by a 0.50m shoulder (Bankett). The outer edges are 1.50m wide embankments (Böschung). The road surface is shown with a 2.5% cross-slope. The subgrade is indicated by a dashed line. The drawing also shows the 2:1 slope of the embankment and the 1:1.5 slope of the shoulder. Various elevations and percentages are provided for the different sections.
